ESAB Rogue EM 190 PRO is an inverter-based MIG/MAG welding system designed to address all your welding project needs, from light fabrication to repair and maintenance. The system features industrial-grade arc performance and full featured controls that allow the welder to fine tune arc characteristics based on the material they are welding.

With a weight of only 16.9 kg (37.3 lbs), single voltage input, 230V single-phase and compatibility with 11 kVA (10 kW) generators, this system provides maximum flexibility and portability, both in the shop and in the field.

- Full feature MIG/MAG machine for Synergic MIG/MAG, Manual MIG/MAG, MIG Brazing, Flux-Cored
- Intuitive 5.0 in TFT screen offers clear views with direct interaction
- Synergic Weld Programs (27) – full range of welding parameters, 0.5 – 10.0 mm (0.020 – 0.375 in) with single knob control
- Power Factor Correction (PFC) – ensures a stable arc, resistant to power fluctuations even while working on long extension cables up to 100 m (328 ft)
- Unique rugged industrial design – supporting multiple lift points and cable management
- Arc Dynamics – fine tune arc characteristics for a crisp/stiff arc for carbon steel or a smooth/soft arc for stainless steel
- Jobs – 10 memory save/recall function
- Spool Gun Ready – Rogue automatically configures set up when spool gun is connected
- Multi-language display – configure the display to 1 of 29 languages
- Energy Save Mode – after 2 minutes of inactivity the unit will enter this state to reduce power consumption.
